LETTER OF RECOMMENDATION

To Whom It May Concern:

I am delighted to write this letter in favor of Mr. Akshay Anand. I know him for around a year as a researcher at French National center for Scientific Research (CNRS) and Georgia Tech Lorraine, Aerospace Systems Design Laboratory (ASDL@GTL). I noticed that he is a mature, motivated and hard-working researcher with a deep knowledge and training in his field of expertise.

He has excellent training in mechanical and aerospace engineering related subjects. Furthermore, he has secured excellent grades during his bachelors and masters studies which shows that he was an outstanding student. He has demonstrated a positive work ethic in the workplace and has always been friendly to his colleagues.

Akshay is a great team player and has an excellent communication skill. He has recently submitted his research work to the peer reviewed journal which is currently in the under-review process. He has participated in several conferences and also presented his research at the AIAA Aviation Forum (June 2020). He has submitted part of his research work also in the AIAA SciTech Forum, January 2021.

With the right blend of passion and flair, I believe that Mr. Akshay Anand has the potential to pursue his higher studies in his chosen discipline. I strongly recommend you consider him for admission to the graduate program.

Please feel free to contact me for any further information.

Sincerely,

-Dr. Suresh Sundaram
